Heat You Can Feel, Not See.

The most meaningful moments are rarely planned.

They begin with a conversation that lingers. A dinner that turns into dessert. One more glass of wine. One more story. One more hour beneath the open sky.

But why should outdoor living be limited to the warmest months or the setting sun? At Bronic, we believe an outdoor space should be designed for more. More seasons. More evenings. More time with the people who matter.

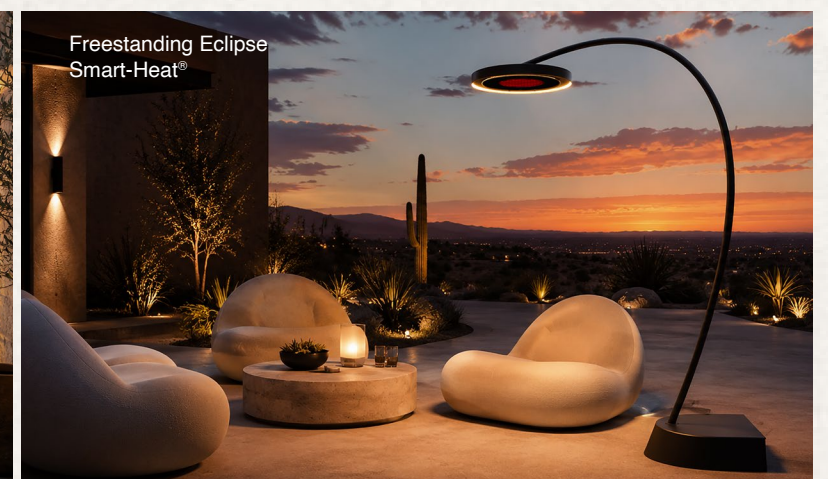

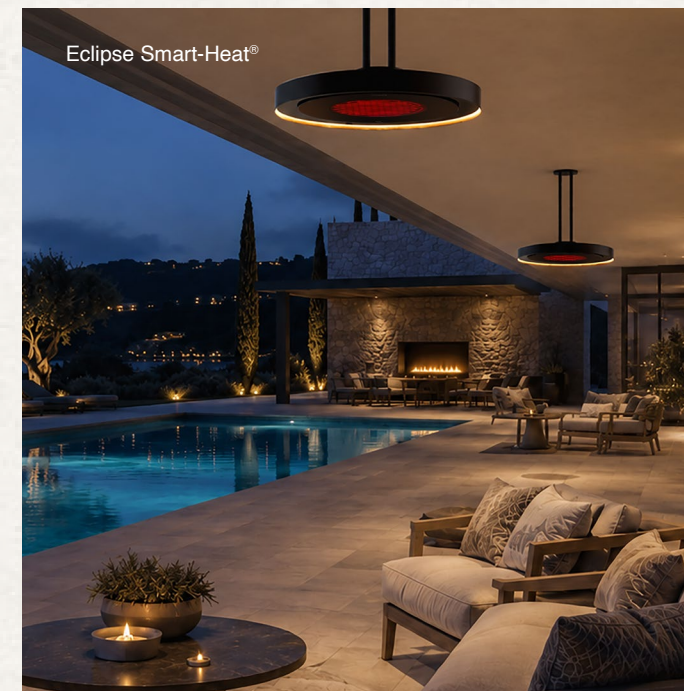

That starts with thoughtful planning—and integrating heat into the space from the very beginning. Our advanced infrared technology delivers targeted radiant warmth directly to people and surfaces, creating warmth that feels like sunlight. Thoughtfully designed solutions integrate seamlessly into the architecture, preserving the beauty and intention of the space.

Because when heating is part of the design, your outdoor space can do more. It can become a place to gather long after summer ends, linger long after the sun goes down, and experience more of what outdoor living has to offer.

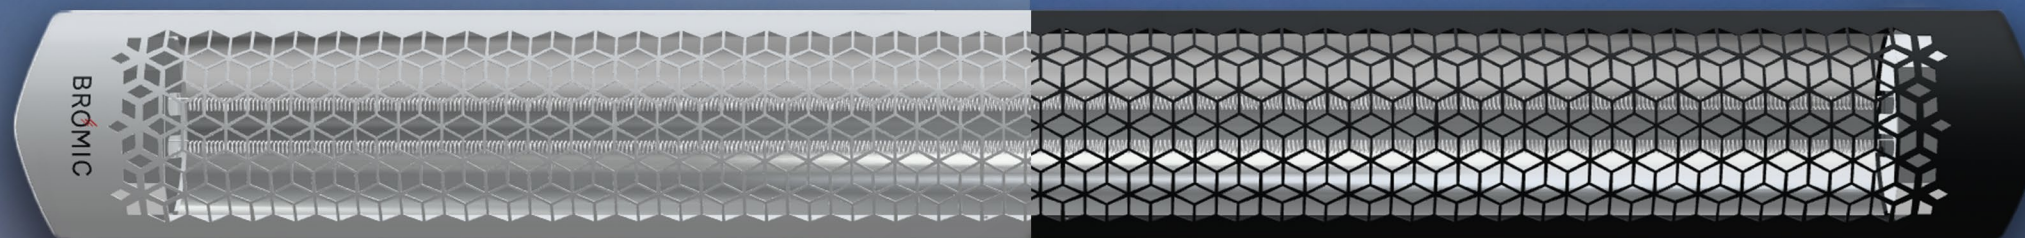

And now, we're taking that thinking somewhere new.

BROMIC
HEATING

Discover the latest evolution in outdoor heating—designed to maximize your outdoor space and extend the possibilities from coast to courtyard.

INTRODUCING THE ALL-NEW
TUNGSTEN
COLLECTIONS
(Coming Soon)

ALL-NEW
TUNGSTEN SMART-HEAT®
COASTAL COLLECTION

ALL-NEW
TUNGSTEN SMART-HEAT®
SELECT COLLECTION

FROM THE MARINA TO THE COURTYARD

Redesigned from the inside out. Uncompromising in heat. A new generation of Tungsten, designed to perform wherever outdoor living takes you.

ALL-NEW TUNGSTEN

COASTAL COLLECTION

(Coming Soon)

Built For Life By The Water.

ALL-NEW TUNGSTEN SMART-HEAT® COASTAL COLLECTION (Coming Soon)

The all-new Tungsten Coastal is engineered for the places where outdoor living meets the elements. Constructed with 316 marine-grade stainless steel for enhanced corrosion resistance, Coastal pairs lasting durability with the refined design of the new Tungsten collection. Available in Black or White with the Signature Diamond Pattern grille, single-post mounting and marine-grade low-clearance recessing, it brings sophisticated warmth to coastal environments without sacrificing the view.

ALL-NEW TUNGSTEN

SELECT COLLECTION

(Coming Soon)

More Choices. Less Compromise.

ALL-NEW TUNGSTEN SMART-HEAT® SELECT COLLECTION (Coming Soon)

The all-new Tungsten Select brings greater design freedom to outdoor heating. Available in Black, White and Graphite, with expanded fascia options, sleek single-post mounting and low-clearance recessing, Select is made to integrate beautifully into the architecture around it. The result is powerful radiant performance with more ways to make the heater feel intentionally designed into the space.

Imagery is intended for design inspiration only. Product scale, placement and installation shown may vary from actual specifications.
Always refer to current Bromic product documentation when planning an installation.

Designed To Fit. Built To Perform.

SMART CONTROL
Connected comfort

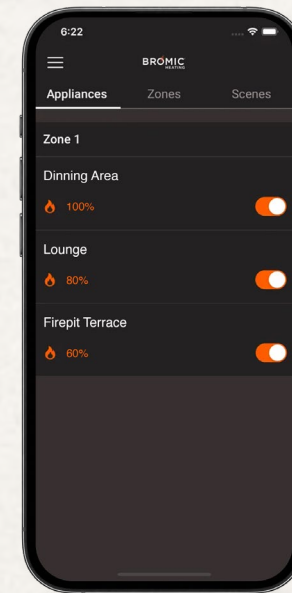

ONE SYSTEM. TOTAL CONTROL.

Create the perfect atmosphere in every zone. Control multiple heaters, set schedules, and enjoy effortless warmth, day or night.

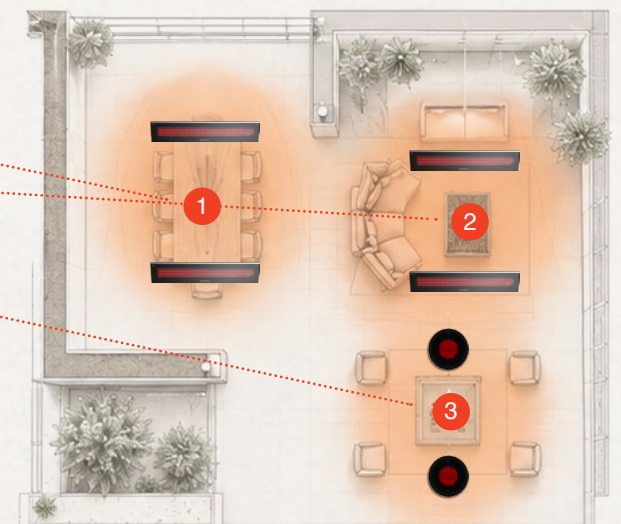

Smarter Heat. Seamless Control.

SMART TECHNOLOGY THAT PUTS YOU IN CONTROL.

The Affinity Smart-Heat® Control System brings your Bronic heaters together in one seamless experience. Manage zones, schedules and settings through the **Bronic Smart-Heat® App**, with integration into leading smart home platforms for effortless control of your outdoor space.

WHOLE HOME ZONE CONTROL

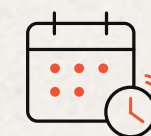

BROMIC APP

Adjust heat, set timers and manage zones from anywhere.

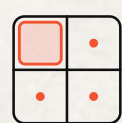

VOICE CONTROL

Works with Amazon Alexa and Google Assistant for hands-free control.

SMART SCHEDULES

Program on/off times to match your routine and save energy.

ZONE CONTROL

Independently control multiple areas at once.

WORKS WITH LEADING SMART HOME SYSTEMS

Compatible with Amazon Alexa, Google Assistant, Control4, Crestron, Lutron.*

AMAZON ALEXA | GOOGLE ASSISTANT | CONTROL4 | CRESTRON | LUTRON

*Compatibility varies by system. Smart home integration requires compatible Bronic Affinity Smart-Heat® Controls and may require additional integration hardware or configuration.

Imagine More Time Outdoors.

OUR DESIGN SPECIALISTS CAN HELP BRING YOUR VISION TO LIFE.

Your outdoor space has more potential. Our complimentary design service gives you expert guidance on heater selection, placement, and coverage to help you create a space designed for more time outside.
